

Course Requirements

Students of Nano Science and Technology Interdisciplinary program belong officially to the existing departments that take part in the interdisciplinary program and should satisfy the requirements of the affiliated department.

Course	Course credits				Research	Total
	General Course	Mandatory Major	Elective Major			
		Interdisciplinary Mandatory Major	Interdisciplinary Elective Major*	Others		
Master	3	6	3	12	less than 12	at least 36
Ph.D.	3	6	9	24	at least 30	at least 72

* Credits earned from a previous master's course at KAIST may be used to fulfill the Ph.D. course credit requirement.

* Course requirements of affiliated departments as well as interdisciplinary one should be satisfied.

□ Master's Program: at least 36 credits

1. General Courses: at least 3 credits
 - Be sure to take Leadership Class (CC010), which is a required course for students who entered in and after the 2002 academic year, but the general scholarship students and foreign students are exceptions.
2. Mandatory Major Courses: 6 credits.
3. Elective Major Courses: at least 15 credits.
 - take courses designated by interdisciplinary program.
(at least 3 credit is sure to take open courses in the other departments with the exception of affiliated departments).
4. Research : less than 12 credits (*Research* of the affiliated department can be a substitute for this course).

□ Doctoral program: at least 72 credits.

1. General Courses: at least 3 credits.
 - Be sure to take Leadership Class (CC010), which is a required course for the students who entered in and after 2002 academic year, but the general scholarship students and foreign students are exceptions.
2. Mandatory Major Courses: 6 credits.
3. Elective Major Courses: at least 33 credits.
 - Take courses designated by interdisciplinary program (at least 9 credits should be taken from courses open in the departments other than the affiliated departments).
4. Research : at least 30 credits (*Research* of the affiliated department can be a substitute for this course).

□ Measures of changes

1. This rule is applied to students who entered in and after the 2003 academic year and applicants for an interdisciplinary major.
2. Those courses not listed as electives can be approved as electives only if their relation to the Nano Science and Technology is approved by the Course Committee.
3. The thesis advisor of the student should take part in Nano Science and Technology interdisciplinary program and the research should have something to do with Nano Science and Technology.
