

## **1. Mission Statement**

### **□ Foresight based on tech-knowledge**

In our curricula, we introduce cutting-edge science technologies such as IT, BT, NT, and ET as mandatory general courses, teach various futures studies research method, and let students explore in-depth strategies in different fields to educate on scientific foresight based on tech-knowledge.

### **□ Future strategies in various fields**

We offer curricula that can solve global and local issues through different foresight methods, and provide structured future strategy tools that help designing and implementing strategies in technology • industry • social welfare • business.

## **2. Educational Direction**

### **□ help public officials in establishing future strategy and planning policy**

We run night programs for office workers, and conduct forums, symposiums, and seminars to exchange academic discussions and policies.

### **□ interaction with future strategy • policy research institute and professionals**

We have set up the Research Institute for Future Strategy to connect education and research, and we interact with economic institutes such as STEPI, Samsung, LG, and Hyundai as well as world's famous universities to foster futures studies and long-term national visions.
