Introduction

- ❑ Program name: KEPSI (KAIST Educational Program for the Semiconductor Industry) is an industry-university collaborative program established in the School of Electrical Engineering, of KAIST from 1996.
- ❑ Purpose: KEPSI is a special program to satisfy the demands of high-tech industries and to foster highly qualified engineers who will play a leading role in semiconductor industries in the 21st century.
- ❑ Six departments in KAIST (electrical engineering, Computer Science, physics, chemistry, biological & chemical engineering, material engineering) have participated in this program.
