

1. Introduction to the Moon Soul Graduate School of Future Strategy

“The school is named ‘Moon Soul Graduate School of Future Strategy’ in order to honor the wishes of Moon Soul JUNG, a former board member of KAIST, who has donated a large amount of foundational money.”

The school was branded as Moon Soul Graduate School of Future Strategy in 2013. It is named after its chief benefactor Moon Soul JUNG, a Korean entrepreneur and a former board member of KAIST, who has donated \$30 million to date. The current dean is Kwang Hyung LEE, who has been on the faculty of KAIST for more than 32 years and currently serves Mirae Chair Professor, Dept. of Bio and Brain Engineering.

Moon Soul Graduate School of Future Strategy covers a wide range of disciplines within future strategy, intellectual property and science journalism at the highest scholarly level, and the master and doctoral programs strike a balance between science and practice. We integrate and innovate across disciplinary boundaries, yet keep a firm grip on the fundamentals.

© Foresight and excellent faculty leading the age

- Excellent faculty who have experience and expertise in futures studies, strategy, intellectual property, journalism, etc.
- Annual national symposium on each field

KAIST Moon Soul Graduate School of Future Strategy

In order to lead the future society based on the fusion of new technologies and knowledge, we will identify long-term strategies and large-scale policy tasks for more than 20 years, and cultivate creative professionals who will overcome uncertainties in the future through future strategy, intellectual property and science journalism.

MIP - To promote in-depth understanding of intellectual property issues and to cultivate advanced manpower of intellectual property, equipped with engineering, law, and management mind.

SJ - To understanding the convergence of science and technology and media culture with the arrival of the new media age, and to cultivate advanced manpower leading the new media age

FS - to develop advanced manpower to plan future strategies in consideration of future-shaping factors such as society and technology in the changing international situation and global environment
