

**Overview**

The Department of Management Engineering (ME) at KAIST Business School pursues excellence in academic research based on great emphasis on scientific methodology and theoretical expertise. ME offers master and doctoral programs to train young scholars on various skills necessary for academic research. The research areas include Accounting, Managerial Economics, Finance, Organization and Strategic Management, Marketing, IT Management, Operations Strategy and Management Science. Our alumni are taking part in the various parts of society as policy makers, business managers, CIO (Chief Information Officer), senior researchers or educators at domestic companies, universities and research institutes. If there are official requests from universities, research institutes, government organizations, and companies, students are recommended by the school through a recommendation process.
