

Green Business and Policy Program

Introduction

■ Introduction

Green Business and Policy Program (MS) nurtures world-class public and private sector experts to objectively analyze management and policy issues to cope with climate change and sustainable growth. The program offers curriculums on green technology, green policy, international negotiations aiming at an integrated understanding of management, markets, policies, and technologies. By providing a research-oriented academic curriculum and a curriculum for fostering practitioners, the curriculum can be effectively completed according to a student's career plan. Also, Concentration program on green business, green policy, and green finance offers systematic in-depth learning curriculum. Moreover, the program provides students with access to the latest information and research through green seminars with experts from related fields, helping the students broaden their expertise and engage in creative and proactive learning.
