Introduction

The Department of Electrical Engineering in KAIST is one and only department in Korea which includes the fields of communications and computing, convergence device and systems, brain and smart systems and many more. More than 90 faculty members are experts at their own research interests with the state-of-the-art capacities. We aim to foster people, who perform the tasks of education, research, and community service with their talent of interests; who fulfill the role of leaders at their fields; and who have the understandings thorough in theory as well as the ability to resolve practical problems. Our curriculum emphasizes group seminars and hands-on experiments which requires not only knowledge on specialty but also related theory and applications of other fields.
