

Course Requirements

The STP Minor Program focuses on issues arising from the intersection of science, technology and public policy.

☐ Minimum Credit Hours

A minimum of 18 semester credit hours (excluding research credit) are required for completion of the program. The program consists of one required core course (3 credit hours), several elective courses, and a thesis.

☐ Internship

A Student may earn up to 3 units of research credit by participating in the STP Internship program.

☐ Double-Counting Credit Hours

When students take a cross-listed course jointly offered by STP and other department, they may double-count credit hours from the course toward the requirements of both departments. Students may double count a maximum of 9 units until graduation.

- Credit hours from STP 110 may be counted either toward the degree requirement of STP or the University's General Education requirements. Double counting is not allowed.
