

# **Graduate School of Science and Technology Policy (STP)**

## Master's Program

- Curriculum includes basic courses in public policy, political science, economics, cultural studies, and historical analysis, to address science and technology policy.
- Requires students to write a master's thesis within 2 years.
- Guides graduates in continuing their academic training in a doctoral program or in pursuing professional careers in government, international organizations, NGOs, private sector, and journalism.

## Doctoral Program

- Accepts students with a master's degree in policy-related fields, including political science, economics, sociology, journalism, geography and urban studies, anthropology, history, and STS. We also welcome PhDs, MDs, and JDs who wish to pursue a second doctoral degree in STP.
- Requires students to complete a doctoral dissertation within 4 years, depending on the number of courses that can be waived from previous education.
- Prepares students for academic careers in teaching and research, or for high-level positions of policy-making and policy-analysis in government, international organizations, NGOs, private sector, and journalism.

## Mid-Career Master's Program

- Applicants must have a minimum of 3 years of professional experience in a field with close relation to science and technology, or relevant policy areas.
- Curriculum includes basic courses in public policy, political science, economics, cultural studies, and historical analysis, to address science and technology policy.
- Requires students to write a master's thesis within 2 years.

## Mid-Career Doctoral Program

- Applicants must have a minimum of 5 years of professional experience in a field with close relation to science and technology, or relevant policy areas.
- Applicants must hold a master's degree in sciences, engineering, or other policy-related fields.
- Requires students to complete a doctoral dissertation within 4 years, depending on the number of courses that can be waived from previous education.
