

Graduate School of Innovation and Technology Management Research and Creation

URL : itm.kaist.ac.kr
Dept. Phone : 042-350-4902-4

■ KAIST I&TM is differentiated from conventional business schools as our school emphasizes developing future executives who will lead technology-oriented enterprises, research institutes, and venture start ups.

■ I&TM provides global learning environment for students to grow and lead in innovation and tech-management through collaboration with disitinguished KAIST faculty and internationally recognized institutions.

■ I&TM students are nurtured into extraordinary talents that can serve as a bridge between technology and business.

■ Curriculum program

* The curriculum for elective consists of the following areas:

(a) technology, which has been and will be the core source of innovation;

(b) management, which provides essential business knowledge for running an organization;

and (c) integration, which, on the basis of knowledge on technology and mangement, promotes integrative thinking that can be actually applied to business practices.

On this basis, I&TM students are nurtured into extraordinary talents that can serve as a bridge between technology and business.
