Culture Technology Undergraduate Minor Program	URL : http://ct.kaist.ac.kr
	Dept. Phone : 042-350-2905

▣ **Introduction**

The need for workers who are equipped with professional knowledge in humanities, social sciences, and the arts and also have a background in science and technology is growing. The culture technology minor program is focused on both education and research of technologies converged with culture that are aimed at exploring creative and new scientific research areas, and technologies aimed at enhancing creativity. This program is designed for students who wish to pursue careers in cultural businesses including IT-based cultural content production and planning. It also provides students who want to major in cultural studies of science and technology at the graduate level an opportunity to gain professional knowledge at the undergraduate level.
