▣ Introduction to Social Entrepreneurship MBA

Social Entrepreneurship MBA is a new program launched in 2013 through the collaboration of SK group and KAIST College of Business in order to foster prominent social entrepreneurs with business skills and passion in social innovation.

SE MBA program aims to provide management training specialized in social enterprise establishment which brings social innovation and changes our society in more entrepreneurial ways to resolve world's most pressing problems.

The curriculum is focused not only on fundamental knowledge on business management, but also on SE courses related to business plans and SE Start-up processes.

SE MBA program supports students by providing a chance to directly engage in problem solving processes with joint efforts of local social enterprises and the regional community. Students are requested to join SE start-up programs such as a two-week overseas field trip.

Throughout the SE MBA program, students can build management knowledge, hands-on experiences, social entrepreneurship and global capacity.

▣ KOICA-KAIST Master's Degree in Social Economy

Since 2019, KAIST College of Business has been selected as training institution to carry out KOICA(Korea International Cooperation Agency) Master's Degree Program in Social Economy.

Under Social Entrepreneurship MBA Program, KOICA and KCB invite competent government officials from developing countries to help them gain professional and systematic knowledge, cultivating future key figures of their home countries' development.

The program is comprised of lectures on social economy, management and green growth as well as extracurricular activities including site visits and seminars. In order to help students understand Korea better, various courses on Korean culture and language are provided.

KOICA-KAIST Master's Degree Program in Social Economy program will provide students with a great opportunity to LEARN Korean experiences in economic and social development and TRANSFORM themselves into entrepreneurial professionals, practitioners, and policymakers with deep understanding of social economy.
