,Technology, and Policy			Office: 042-350-4843	

Introduction

The STP Minor Program provides KAIST students aspiring to be future leaders of S&T with opportunities to learn about issues and problems of policy making for S&T as well as frameworks and tools to understand political, social, historical, or cultural factors and institutions affecting and affected by S&T development. It also offers various chances to meet and interact with leaders and practitioners of S&T policy through regular colloquia, special lectures, or internships with public organizations.
